EMERSON M. GONZALES

FULL-STACK SOFTWARE DEVELOPER | Laravel • SaaS Platforms • AI Automation

Manila, Philippines | gonzalesemerson079@gmail.com | +63 960 874 0275 | github.com/Emerson-13

PROFESSIONAL PROFILE

Full-Stack Software Developer with 3 years of experience delivering web and mobile applications, business systems, and multi-tenant SaaS solutions. Experienced across Laravel backend architecture, Vue.js/Inertia.js and React interfaces, API and database design, production deployment, and AI-enabled automation with n8n. Builds end-to-end products, from operational workflows and access control to customer-facing platforms and testing.

PROJECT PORTFOLIO | FEATURED ENGINEERING WORK

AppointBloom | Multi-Tenant Service Booking & Marketplace

Laravel • Vue.js • Inertia.js • PHP • MySQL • REST APIs

- Designed and developed a service-management SaaS that helps providers accept online bookings, manage schedules and staff, communicate with customers, and publish services online.
- Built multi-business and multi-branch structures, role-based access, service profiles, customer booking flows, and location-aware service discovery.
- Designed for clinics, wellness centers, salons, spas, barbers, home services, freelancers, remote professionals, tutors, consultants, coaches, repair providers, and multi-branch companies.
- Implemented marketplace and direct-link booking models with transaction-based service fees and business promotion capabilities.

HR Lifecycle AI Automation Platform | HR Operations & Recruitment

Laravel • Vue.js • Inertia.js • n8n • REST APIs • AI APIs

- Designed an AI-powered HR lifecycle platform connecting recruitment, onboarding, performance, and related HR processes.
- Built AI workflows for job descriptions, competency-based interview sheets, performance evaluations, and CV matching/screening.
- Connected Laravel endpoints to n8n webhook orchestration and designed a recruitment flow from approved job descriptions to public job posts, CV submission, HR review, and screening.
- Developed AI usage and credit-consumption concepts and extended the system design toward competency and career development.

AI-Team-Setup | Shared AI Engineering Framework for Laravel

Claude Code • Codex • Cursor • GitHub Copilot • Gemini • Windsurf • Cline • n8n • Playwright

- Created a shared set of project engineering rules for multiple AI coding tools to coordinate work consistently on Laravel projects.
- Defined engineering-team and strategy-council structures, agent roles and permissions, and shared planning conventions.
- Included n8n AI integration patterns, Playwright end-to-end testing guidance, and a live board to track agent activity and plan progress.

Vyblinx | Social Media & Business Platform

Laravel • Vue.js • Inertia.js

- Led development of a social platform spanning user interactions, content sharing, marketplace/business features, and account workflows.
- Implemented responsive frontend experiences and backend APIs/business logic for web and mobile-oriented workflows.

Enterprise HRIS & Payroll Management System

Laravel • Vue.js • Inertia.js • MySQL

- Contributed to HR and payroll operations, structured employee data handling, reporting, system maintenance, and feature enhancements.
- Implemented application features and business logic supporting employee and payroll processes.

Enterprise Inventory & Procurement Management System

Laravel • Vue.js • Inertia.js • MySQL

- Developed inventory tracking, stock management, procurement workflows, and operational reporting for enterprise users.

UnyRyde | Car Rental & Reservation Platform

Laravel • Vue.js • Inertia.js

- Contributed to vehicle reservation and booking workflows, administrative functionality, and supporting business processes.

Work4U | Online Tutoring Platform

Laravel • Blade

- Developed an online tutoring platform with user management, scheduling, session coordination, and related business workflows.

TECHNICAL SKILLS

Backend & Architecture: PHP, Laravel, Node.js, Express.js, REST APIs, authentication, role-based access, SaaS/multi-tenant architecture

Frontend: Vue.js, Inertia.js, React, JavaScript, TypeScript, Blade, HTML5, CSS3, responsive UI

Databases: MySQL, MongoDB, Firebase, Supabase, schema design and query optimization

AI Development & Automation: n8n, webhooks, AI API integrations, AI agents, Claude Code, Codex, Cursor, GitHub Copilot, Gemini, Windsurf, Cline

CMS & No-Code: WordPress, visual website builders, CMS management

Testing & Delivery: Playwright E2E, Git, GitHub, GitLab, AWS, VPS deployment, debugging, production troubleshooting

PROFESSIONAL EXPERIENCE

Mobile/Web Developer | Leepe Outsourcing Corporation | 2025–Present

Develop and maintain web/mobile applications, REST APIs, database structures, and reusable components; support architecture, deployment, testing, debugging, and production operations.

Freelance Full-Stack Developer | Independent / Client Projects | 2023–2025

Delivered custom web applications and business systems from requirements and UI design through backend implementation, database modeling, deployment, and maintenance.

EDUCATION

Bachelor of Science in Computer Engineering | Universidad de Manila
